2026 Michigan Perfusion Quality Improvement "U-Pick"
Pay-For-Performance (P4P) Project

Using PERForm to Support Quality Improvement Efforts

Background: The 2026 Michigan Society of Thoracic and Cardiovascular Surgeons Quality Collaborative (MSTCVS-QC) PERForm pay-for-performance (P4P) initiative focuses on supporting Michigan sites in using their own PERForm data to monitor and advance a quality improvement initiative of their choosing.

Each Michigan site is encouraged to collaborate within its surgical team to select a PERForm Registry metric to track from January 1, 2026, through September 30, 2026. This metric does not need to be perfusion-specific, but it must be a variable captured in the PERForm registry. Metrics may complement ongoing state-wide initiatives (e.g., reducing intra-operative RBC use) or support site-specific priorities (e.g., increasing post-operative debrief completions).

Sites should identify their metric and submit it to the MSTCVS Coordinating Center (dnieter@med.umich.edu) by the February 18, 2026 virtual PERForm meeting for discussion at that meeting where submissions will be reviewed and discussed.

Useful PERForm tools for this project include Data Tables, Metric Library, and Data Quality Report. Training videos are available through the ARMUS Health Catalyst Support ZenDesk with links posted on the mstcvs.org website.

P4P Deliverables

The Chief Perfusionist or a designated representative with PERForm data extraction access are *encouraged* to submit a progress report summarizing the selected metric prior to the Spring and Summer Quarterly Quality Collaborative meetings (via REDCap) for the purpose of fostering discussion and garnering feedback. Deadlines for these quarterly submissions are:

Q1 submission: May 12, 2026

Q2 submission: August 11, 2026

The "final" *required* report must be submitted by **November 10, 2026,** for the hospital to receive 2026 Perfusion P4P points. This report must include data for the selected metric for Q1, Q2, and Q3 of 2026.

All files should be uploaded to REDCap using the following path:

MSTCVS ➡ PERForm ➡ Michigan ➡ Your Hospital Name ➡ P4P

EXAMPLE: Debrief Tracking

Below is an example of tracking post-operative debrief completion using the PERForm Data Tables exported to Excel.

- Q1 2025: 9 cases (4 Yes, 3 No, 1: NULL) ➡ 44.4% with a documented debrief
- Q2 2025: 12 cases (7 Yes, 5 No) ➡ 58.3% with a documented debrief
- Q3 2025: 19 cases (10 Yes, 5 No, 4 NULL) ➡ 52.6% with a documented debrief
