There are two tables on this page: the first shows Institutional (STS) to PERForm unmatched cases, and the second shows PERForm to Institutional (STS) unmatched cases.

If there's a difference in case counts — for example, PERForm has more cases than STS — you'll see more unmatched PERForm cases, and vice versa.

You can review the unmatched cases, and if you believe a case should (or shouldn't) be included in the table, please reach out to us and fill out the feedback form so we can investigate the issue.
